

MULTIUSE SANITIZER

MODEL
OZ2

Ozone generator to remove bad smells and perform an ecological disinfection on vehicle interiors and objects such as helmets, gloves, shoes, etc.

It removes unpleasant smells, bacteria, fungi and up to 99,99% of known pathogens in a quick, efficient and ecological manner.

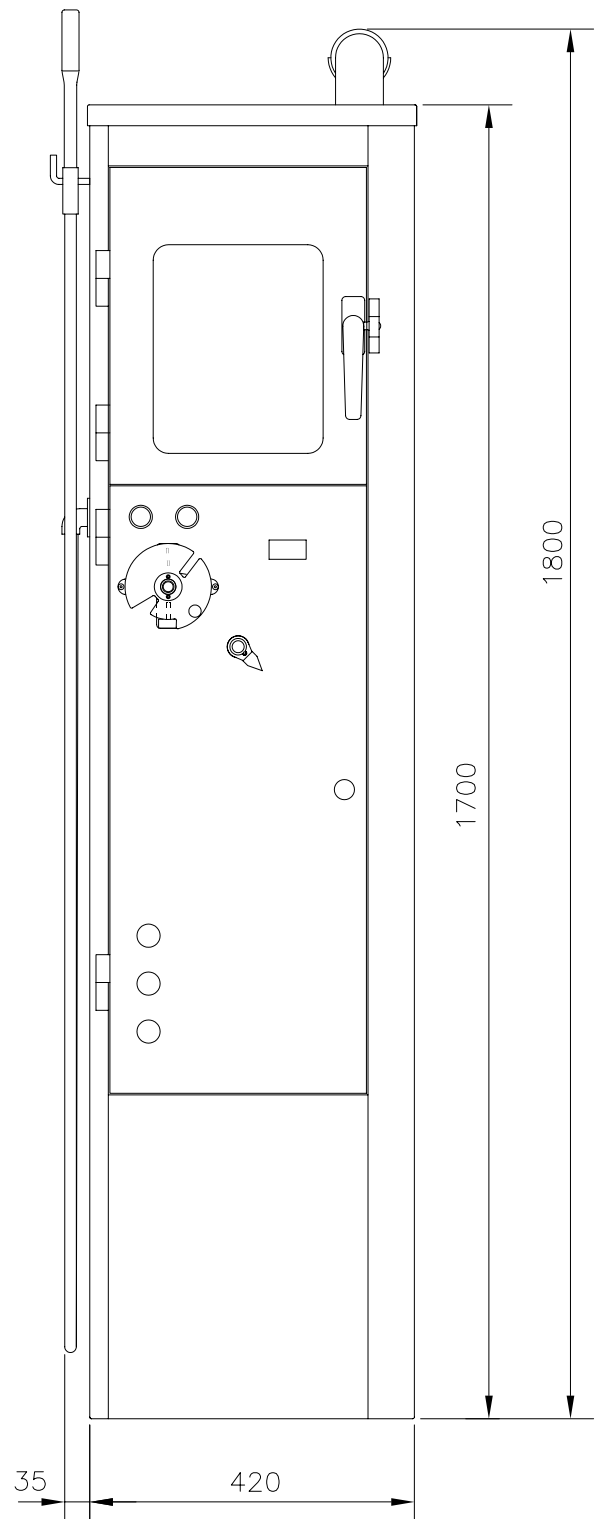

CHARACTERISTICS

- Suitable for outdoor spaces.
- Structure in stainless steel AISI 304, 2mm thickness.
- Operates through coins or tokens.
- It consists of a cabinet where objects such as helmets, gloves, shoes, jackets, etc. can be deodorized and disinfected within approximately 5 minutes, and a nozzle with a flat design ideal for staying pressed into the vehicle's door to carry out the deodorization and disinfection treatment in approximately 7 minutes.
- A display-based indicator for the selected treatment price. Once the required coins have been inserted, the operation time can be visualized on the screen. This time will decrease minute by minute until the treatment is finished.
- Easy programming of the coin quantities to be inserted for each treatment option, as well as their timings.
- Indicator lights for the different treatment phases and upper cabinet lighting when selected.
- Easy maintenance.
